

PEMI HOME SYSTEM HELPFUL TIPS

HEALTHY PEOPLE HEALTHY CELLS

Whenever a disease appears in the body, behind it there are cellular dysfunctions. Disease is principally due to low cell voltage, disturbed metabolic processes/metabolism. Our Cellular Home Therapy System activates and improves the cell voltage, metabolism and clears EMF from the body, restoring cell-to-cell communication. It is the first device by which the ion transport was patented.

BREAK Free

MEDICATIONS

Consult and work with your doctor if you are taking medications. It has been shown that in many cases medication is reduced because the cells begin to absorb and regulate itself. That means that the physician should observe the user closely and reduce the medication gradually until no longer needed.

GET THE BEST RESULTS

As easy as ...

For best results, first use the full body mat for 16 minutes on a Tranquility 3. Directly follow it with a 24 minute treatment with either pillow pad or any applicator. Hydrate with water. It's beneficial to take magnesium once per day. Use this as a foundational protocol up to a maximum 2 to 3 times per day and per comfort level.

CELLULAR THERAPY SYSTEM

The full body mat

The body recuperates faster in parasympathetic mode. The full body mat envelopes the entire body in gentle frequencies, relaxing the entire body and prepping it for direct target therapies with the applicators.

Recommended usage

To keep it simple and easy we recommend setting your auto-clock for AM and PM. In the morning set 30 minutes before you wake. Then follow with applicator for more targeted and rapid results. If you decide to only work with the body mat, results will take longer.

Take it on the go

The PEMI Home System is durable and comes with a three-year warranty. You can place it in a recliner, roll it up in a suitcase and use it whenever you travel.

APPLICATORS

EARPHONES

Use for all conditions of the ears, tinnitus, vertigo, sinuses, nerves, and lymphatics.

EYE GOGGLES

Use for all conditions of the ocular, eyes, sinuses, lymphatics, eye bags, eye rings, nerves and muscles.

PEN

Use for very small areas, like; knuckles, eyes, ears, sinuses, tendons, all joints, wounds, spinal column, teeth, gums, TMJ.

WATER & minerals

HYDRATION

With several daily applications it is absolutely necessary to supplement the body with magnesium and a lot of water. This will increase the hydrogen ions transport, avoid cramps in the calves and improve the elimination of toxins.

HELPFUL TIPS

Contraindications

There are no contradictions for pacemakers or metal implants. Pregnant women must be approved and monitored by their doctor. There are no contraindications because the frequency output matches the same power intensity as the brain's communication output to the body.

Hydration

With several daily applications it is absolutely necessary to supplement the body with magnesium and a lot of water. This will increase the hydrogen ions transport, avoid cramps in the calves and improve the elimination of toxins.

Sensitive People

It has been observed that the duration of therapy has to be adjusted differently for sensitive people.

It's very rare for people to be highly sensitive to electromagnetic energy. However, our product has a protocol designed specifically for sensitive people to become acclimated to this gentle therapy in a short time.

An overdose is not possible as our system works at a field strength of up to 40 microteslas. The World Health Organization and other technical associations consider a constant load of 100 microteslas (at 60 Hz) as safe.
